ETHetc - ETC Group Physical Ethereum

Factsheet | Data as of 31 Mar 2021

Investment Objective

ETC Group's Physical Ethereum (Ticker: ZETH) is an exchange traded cryptocurrency (ETC) that tracks the price of Ethereum's Ether coin. ZETH's primary listing is on Deutsche Börse's XETRA and is centrally cleared and provides investors with a secure and liquid way to gain exposure to the Ether cryptocurrency. Each unit of ZETH is 100% physically backed by Ether and gives the holder a claim on a predefined amount of Ether. ZETH is issued by ETC Group and marketed and distributed by HANetf. The value of your investment may go down as well as up and past performance is no indication of future performance. Your capital is at risk.

Why ZETH?

An easier way to invest in Ether

Investing in ZETH is as simple as buying shares through your broker or bank. Unlike investing directly in Ether, there is no need to engage with the technical challenges of setting up a cryptocurrency wallet to store Ether* as your units of ZETH are safely held with your broker or bank.

*Investors only need a cryptocurrency wallet if they want to redeem for Ether

Invest in Ether on a regulated exchange

ZETH's primary listing is on XETRA, one of the largest exchanges in Europe. Investors can trade with confidence knowing that all market participants are strictly vetted and carefully monitored to prevent market abuse unlike cryptocurrency exchanges, many of which are unregulated. The issuer has partnered with world-class liquidity providers to ensure ample on exchange liquidity and tight spreads.

Safe Custody

The issuer stores the Ether with BitGo Trust Company, a secure, regulated custodian, purpose built for holding digital assets. Strict KYC and AML standards ensure that the provenance of all cryptocurrency in custody has been vetted.

Key Risks

1. Investors' capital is at risk and investors may not get back the amount originally invested and should obtain independent advice before making a decision.
2. Any decision to invest should be based on the information contained in the relevant prospectus.
3. ETC securities are structured as debt securities, not as equity.
4. ETCs trade on exchanges like securities. They are bought/sold at market prices which may be different to the net asset value of the ETC.
