LTCetc - ETC Group Physical Litecoin

Factsheet | Data as of 31 Dec 2021

## Investment Objective

LTCetc - ETC Group Physical Litecoin is an exchange traded cryptocurrency (ETC) that tracks the price of Litecoin (LTC). ELTC's primary listing is on Deutsche Börse's XETRA and is centrally cleared, providing investors with a secure and liquid way to gain exposure to the Litecoin cryptocurrency. Each unit of ELTC is 100% physically backed and gives the holder a claim on a predefined amount of Litecoin. ELTC is issued by ETC Group and marketed and distributed by HANetf. The value of your investment may go down as well as up and past performance is no indication of future performance. Your capital is at risk.

## Why ELTC?

### An easier way to invest in Litecoin

Investing in ELTC is as simple as buying shares through your broker or bank. Unlike investing directly in Litecoin (LTC), there is no need to engage with the technical challenges of setting up a cryptocurrency wallet to store LTC\* as your units of ELTC are safely held with your broker or bank. \*Investors only need a cryptocurrency wallet if they want to redeem for LTC

### Invest in Litecoin on a regulated exchange

ELTC's primary listing is XETRA, one of the largest exchanges in Europe. Investors can trade with confidence knowing that all market participants are strictly vetted and carefully monitored to prevent market abuse unlike cryptocurrency exchanges, many of which are unregulated. The issuer has partnered with world-class liquidity providers to ensure ample on exchange liquidity and tight spreads.

### Safe Custody

The issuer stores the Litecoin backing the securities with BitGo Trust Company, a secure, regulated custodian, purpose built for holding digital assets. Strict KYC and AML standards ensure that the provenance of all cryptocurrency in custody has been vetted.

## Key Risks

1. Investors' capital is at risk and investors may not get back the amount originally invested and should obtain independent advice before making a decision.
2. Any decision to invest should be based on the information contained in the relevant prospectus.
3. ETC securities are structured as debt securities, not as equity.
4. ETCs trade on exchanges like securities. They are bought/sold at market prices which may be different to the net asset value of the ETC.
5. Cryptocurrencies can be highly volatile and your capital is at risk.
6. For professional investors only.

**Partner**

ETC Group brings together financial services professionals with experience spanning both the worlds of digital assets and regulated markets with a single goal: to make investing in crypto-currencies easy and transparent. Much has been said but little done in delivering what the institutional investor wants and expects in this space. In developing this platform, the team at ETC has taken every care to deliver products with integrity that address the very real concerns that many investors have in trading unregulated assets.

United within ETC Group is one of the world's largest electronic market makers, two London-based FCA- regulated brokers and a team of experienced financial services professionals all bringing network and know-how to the venture. In the traditional sense, ETC stands for "exchange traded commodity". ETC Group branded the venture under the ETC brand hijacking the traditional acronym and turning it into "exchange traded crypto" ("ETC").

**About HANetf**
