2 INVESTMENT MANAGER

The Manager has appointed **Vident Investment Advisory LLC** as investment manager for the Sub-Fund (the **Investment Manager**) with a discretionary mandate pursuant to an investment management agreement dated 31 August 2018 between the Manager and the Investment Manager (the **Investment Management Agreement**) described under the heading **Material Contracts** below.

Under the terms of the Investment Management Agreement, the Investment Manager provides, subject to the overall supervision and control of the Manager, investment management services to the Manager in respect of the Sub-Fund's portfolio of assets. It may delegate all or part of the investment management responsibilities to one or more sub-investment managers, may obtain the services of investment advisers on a non-discretionary basis and may obtain third party research advice with the fees in respect of any such delegation being paid by the Investment Manager out of its own fee.

3 INVESTMENT OBJECTIVE AND POLICIES

3.1 Investment objective

The investment objective of the Sub-Fund is to track the price and the performance, before fees and expenses, of an index that measures the performance of publicly-traded companies that are involved in innovative and disruptive technological trends across a broad range of industries.

3.2 Investment policy

In order to seek to achieve its investment objective, the Sub-Fund will adopt a "passive management" investment strategy and will seek to employ a replication methodology, meaning as far as possible and practicable, it will invest in all of the securities in proportion to the weightings comprising the **Solactive Innovative Technologies Index** (the **Index**).

The Sub-Fund may, from time to time, use a sampling methodology under various circumstances, including when it may not be possible or practicable to purchase all of the securities in the Index, for example, due to lot size issues or local market restrictions which may apply in certain emerging or frontier markets.

The Investment Manager will regularly monitor the Sub-Fund's tracking accuracy. Information relating to the anticipated tracking error is set out in the section entitled **Tracking of Index** below.

Further details in relation to the investment approach are set out in the section entitled **Optimised Index Replication** in the Prospectus.

The Sub-Fund may invest in markets in respect of which the local government imposes limitations or restrictions on foreign ownership or holdings. In order to access such markets the Sub-Fund may use instruments such as exchange-traded American Depositary Receipts (**ADRs**), American Depositary Shares (**ADSs**), Global Depositary Receipts (**GDRs**) and International Depositary Receipts (**IDRs**) in order to gain exposure to equity securities instead of using physical securities where, due to such local restrictions or quota limitations, it is not possible to hold these directly. Stocks which are listed on the Shanghai Stock Exchange or the Shenzhen Stock Exchange must be available to purchase via the Stock Connect.

Under Stock Connect, overseas investors (including the Sub-Fund) may be allowed, subject to the requirements of the Central Bank and any rules and regulations issued/amended from time to time, to seek exposure to stocks issued by companies listed on exchanges in the People's Republic of China (**PRC**) by directly trading certain eligible A-shares through the so-called Northbound Trading Links. Stock Connect currently comprises the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect. The Shanghai-Hong Kong Stock Connect is a securities trading and clearing links program developed by Hong Kong Exchanges and Clearing Limited (**HKEx**), China Securities Depository and Clearing Corporation Limited (**ChinaClear**) and SSE, with an aim to achieve mutual stock market access between Shanghai and Hong Kong. Similarly, the Shenzhen-Hong Kong Stock Connect is a securities trading clearing links program developed by HKEx, ChinaClear and SZSE, with an aim to achieve mutual stock market access between Shenzhen and Hong Kong. Further information about Stock Connect is available online at the website: http://www.hkex.com.hk/eng/market/sec_tradinfra/chinaconnect/chinaconnect.htm

The Sub-Fund may invest in ancillary liquid assets and money market instruments which may include bank deposits, certificates of deposit, commercial paper, floating rate notes and freely transferable promissory notes.

Investors should also note that the Sub-Fund may invest in ETFs established as collective investment schemes and authorised as UCITS in pursuit of its investment objective, subject to the investment restrictions outlined in the Prospectus.

The ancillary liquid assets, money market instruments and FDI (other than permitted unlisted investments) held by the Sub-Fund will be listed or traded on the Regulated Markets referred to in Appendix 1 of the Prospectus.

3.3 **Use of financial derivative instruments and efficient portfolio management**

Investors should note that the Sub-Fund may also invest in FDIs for efficient portfolio management or hedging purposes. The Sub-Fund may use futures, currency swaps and currency forwards for the purpose of reducing risk associated with currency exposures within the Sub-Fund. This may on occasions lead to an increase in the risk profile of the Sub-Fund or result in a fluctuation in the expected level of volatility. Please see the section entitled **Risk Factors** in the Prospectus in relation to such risks.

The Sub-Fund will employ the commitment approach to assess the Sub-Fund's global exposure and to ensure that the Sub-Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Sub-Fund may be leveraged through the use of the FDIs, any such leverage would not be expected to be in excess of 100% of the Sub-Fund's Net Asset Value. Including

FDI's, the total exposure associated with the investments of the Sub-Fund, may not exceed 200% of the Net Asset Value of the Sub-Fund.

Investment in FDIs is subject to the conditions and limits contained in the Central Bank UCITS Regulations issued by the Central Bank. Subject to these limits, the Sub-Fund may invest in FDIs dealt on any of the regulated markets set out in the list of Regulated Markets in Appendix 1 to the Prospectus (and/or over the counter FDIs (OTCs)) which will be used for investment, efficient portfolio management and/or for hedging purposes.

The ICAV employs a risk management process which enables it to accurately measure, monitor and manage at any time the various risks associated with FDIs and their contribution to the overall risk profile of the portfolio of assets of the Sub-Fund. The ICAV will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments. The Sub-Fund will only invest in FDIs in accordance with the risk management policy filed with the Central Bank

The Sub-Fund may invest in FDIs dealt over-the-counter provided that the counterparties to over-the-counter transactions are institutions subject to prudential supervision and belonging to categories approved by the Central Bank.

Position exposure to the underlying assets of FDIs, including embedded FDIs in transferable securities or money market instruments, when combined where relevant with positions resulting from direct investments, may not exceed the investment limits set out in the Central Bank UCITS Regulations.

Please see the section entitled **Use of Financial Derivative Instruments and Efficient Portfolio Management** in the Prospectus in relation to FDI.

3.4 **Securities financing transactions**

While the ICAV may enter into Securities Financing Transactions, it is not anticipated that the Sub-Fund will enter into any Securities Financing Transactions. However, in the event that the Sub-Fund contemplates entering into such transactions, investors will be provided with further details of the structure and use of such transactions, together with any other information required to be disclosed to investors in accordance with Articles 13 and 14 of the SFTR. The Supplement will be updated accordingly in the event that the Sub-Fund will enter into any Securities Financing Transactions.

4 **PORTFOLIO TRANSPARENCY**

Information about the Investments of the Sub-Fund shall be made available on a daily basis. The Sub-Fund will disclose on www.HANetf.com at the start of each Business Day the identities and quantities of the securities and other assets held by it. The portfolio holdings will be based on information as of the close of business on the prior Business Day and/or trades that have been completed prior to the opening of business on that Business Day and that are expected to settle on that Business Day.

5 **TRACKING OF INDEX**

The anticipated tracking error of the Sub-Fund is not a guide to its future performance. The annualised tracking error envisaged is not anticipated to exceed 2% under normal market conditions.

Further information on the anticipated tracking error is set out in the section entitled **Tracking of Index** in the Prospectus.

6 **INFORMATION ON THE INDEX AND INDEX PROVIDER**

This section is a brief overview of the Index. It contains a summary of the principal features of the Index and is not a complete description of the Index. In case of inconsistency between the summary of the Index in this section and the complete description of the Index, the complete description of the Index prevails. Information on the Index appears on the website identified below in **Further Information**. Such information may change from time to time and details of the changes will appear on that website.

Size and Liquidity Criteria

(iv) have a security level market capitalisation (**Security-Level Market Capitalisation**) of at least \$100 million at the time of inclusion in the Index;

(v) have a one-month and six-month average daily traded value of at least \$1,000,000 prior to and including the Selection Day;

If there are no companies that pass the liquidity and size criteria of the Index Category, that Index Category is not considered further in the index selection process.

Based on the above criteria, the constituents are filtered according to the selection process below and sorted by Index Categories.

Selection Process

On the last Business Day in February and August (each a Selection Day) the Index committee reviews the Index Categories to assess eligibility which may include the addition of new industries and sub-industries.

(i) In respect of the Future Cars category the selection process of the Index Components is as follows:

From all companies classified in the subindustry “Auto Interior Comfort/Safety/Electronics Products” the five (5) companies with the largest Security-level Market Capitalization are available for inclusion. Next, all other companies in the Index Category ~~and~~ including the five (5) selected companies from the “Auto Interior Comfort/Safety/Electronics Products” sub-industry are sorted according to Security-Level Market Capitalization and the 15 top ranked companies are selected as Index constituents.

(ii) For all other Index Categories, the selection process of the Index Components is as follows:

The Top 15 eligible companies in each Index Category are sorted according to Security-Level Market Capitalisation and liquidity criteria and are selected as Index Components. If there are less than 15 eligible companies in an Index Category the Index includes all eligible companies for such Index Category. If there are no eligible companies within a certain Index Category, the Index Category receives a zero weight until the next Selection Day.

Where a Company is classified in more than one Index Category, such company will be retained in the Index Category where it is ranked highest based on Security-Level Market Capitalisation. The company is then excluded from all other Index Categories by replacing with the next highest ranked company in its index Category. If companies have the same rank across multiple Index Categories, the company is kept in the Index Category where it has the largest Security-level Market Capitalisation share within its Index Category.

Weighting

(i) For Index Categories with 10 or more eligible companies:

On each Selection Day, each of the Index Categories receives a weight which is equal to 100 per cent divided by the number of Index Categories in the Index. Index Categories are equally weighted, provided that the Index Category has 10-15 companies eligible for inclusion.

(ii) For any Index Category with less than 10 eligible companies;

On each Selection Day, the Index Category shall receive a total weight based on the following formula:

Total weight = $100\% / n * (x / 15)$.

Where: n = Number of Index Categories that are considered as eligible

x = Number of companies per Index Category that pass the criteria outlined above.

The excess weight is equally distributed among all other Index Categories.

For example, if 6 of the 8 Index Categories pass the size and liquidity criteria, then each of the 6 Index Categories would get a total weight of $100/6 = 16.66\%$. Each Index Category should have at least 10 companies, but if one Index Category only has 9 companies that pass the size and liquidity criteria, that Index Category will receive a total weight of $100/6*(9/15) = 10.00\%$. All excess weight (in this example, 6.66%) is redistributed equally among the other 5 Index Categories

Once the weights have been determined for each Index Category, Index Components within the Index Categories are weighted equally.

The Index will rebalance semi-annually on the 5th Business Day after the Selection Day in March and September in each calendar year (the **Adjustment Day**).

The Index is calculated based on a total return methodology, both real time intra-second and end of day.

The Index has a base date of 6 September 2013 and a base value of 100 points.

Solactive AG (the **Index Administrator**) maintains the Index which includes monitoring and implementing any adjustments, additions and deletions to the Index based upon the Index methodology or certain corporate actions, such as initial public offerings, mergers, acquisitions, bankruptcies, suspensions, de-listings, tender offers and spin-offs. The Index cannot be invested in directly.

Additional information on the Index can be found on <https://www.solactive.com/indices/>.

7 **INVESTMENT RESTRICTIONS**

The general investment restrictions as set out in the Prospectus shall apply.

The Sub-Fund may not invest more than 10% of its Net Asset Value in open-ended collective investment schemes.

There may be instances where the weighting of any constituent security of the Index could cause the Sub-Fund to breach the investment restrictions set out in the Prospectus. If such an event occurs, it is intended that the Sub-Fund will purchase other assets, the effect of which will seek to maintain, so far as is possible, the same economic exposure to and the same weighting of the security of that issuer in the Index without breaching its investment restrictions.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders.

8 **BORROWING**

The Sub-Fund may borrow money in an amount up to 10% of the market value of its net assets at any time for the account of any Sub-Fund and the Depositary may charge the assets of the Sub-Fund as security for any such borrowing, provided that such borrowing is only for temporary purposes.

The Sub-Fund may acquire currency by means of a back-to-back loan agreement. Foreign currency obtained in this manner is not classified as borrowing for the purposes of the UCITS Regulations provided that the offsetting deposit is denominated in the Base Currency of the Sub-Fund and equals or exceeds the value of the foreign currency loan outstanding.

9 **RISK FACTORS**

While the general risk factors set out in the section entitled **Risk Factors** in the Prospectus apply to the Sub-Fund, the following risk factors described in the Prospectus under the headings **Absence of prior active market, Capital Controls and Sanctions Risk, Concentration Risk, Emerging Market Risks, Stock Connect Risk, Currency Risk, Interest Rate Risk, Liquidity of Investments, Small- and Mid-Capitalisation Risk, Political and/or Legal/Regulatory Risk, Regulatory Restrictions, Index Rebalancing and Costs, Issuer-specific Risk, Information Technology Companies Risk and Internet Companies Risk** are particularly relevant for the Sub-Fund.

10 **DIVIDEND POLICY**

Where any Distributing Shares are issued, the Directors may declare dividends annually on or about December in each year to the Shareholders of such Shares out of the profits of the Sub-Fund attributable to the Distributing Shares, in accordance with the terms of the Prospectus. The profits attributable to the Accumulating Shares in the Sub-Fund shall be retained within the Sub-Fund and will be reflected in the Net Asset Value of the Accumulating Shares.
